

Eraser for Apple Devices

Blancco offers comprehensive erasure and diagnostics software for a wide range of Apple devices including Apple M1s, T2s, iPhones, iPads and iPods to suit your needs and work in tandem with your processing set up. Additionally, custom workflows can be added to help guide operators to grade, value and sort each device according to your policies and requirements, more quickly and easily. We continually monitor and upgrade our software, to keep pace with Apple products and releases.

Blancco Eraser for Apple Devices - Product Brief

Blancco products available as part of this solution include:

- Blancco Eraser for Apple Devices - the fastest, most effective and fully verified erasure on the market, specially configured for Mac erasure, supporting iPhones, iPads, M1s, and T2s (Catalina macOS 10.15.6 or newer)
- Blancco Drive Eraser - permanent sensitive data erasure from servers, laptops, desktops, and drives, supporting T2s
- Blancco Drive Eraser for Mac (based on LUN Eraser) - Offering erasure in active storage environments without compromising operating systems, ensuring LUNs are properly sanitized, supporting M1s and T2s

Contact us to determine which product(s) may be most suitable for your needs.
