

How to create custom views in Management Portal

Created date	Updated date	Affects version	Fix version
22 Sep 2023	22 Sep 2023	Management Portal	N/A

Description

This article will describe how to create custom views in the Blancco Management Portal.

Step by step instructions

The Blancco Management Portal differs from the Blancco Management Console in a number of ways. One of the differences is the lack of default reporting views that exist in BMC. However it is relatively easy to recreate these views as required.

After logging into the portal click on the Reporting tab and select "Reports". You will see a screen like the above screenshot. There is an option called "Our

Views", and to begin with, it is empty. Click the plus sign in a circle icon  to add new views. Below are the column headings for the standard views in the BMC.

Begin under the "General Details" tab by giving the view a name, then choose the product that you want to use for the view, and after that, search for and add the columns that you want in the view.

There are three default columns in any user created view: UUID, Date and Product. Any of these columns can be removed but cannot subsequently be added back as they are configured originally.

The UUID column allows user to open a report in a new browser tab in PDF format acting as a link to the report preview. If you remove the UUID column and attempt to add it back, the UUID column *will* appear in the report view but it will not act as a link, so be aware of that and remove them after some consideration.

Create

BMC Default View columns

View	Column 1	Column 2	Column 3	Column 4	Column 5	Column 6	Column 7	Column 8	Column 9	Column 10
------	----------	----------	----------	----------	----------	----------	----------	----------	----------	-----------

All reports	Date	Erasure State	Disk Serial	Disk Capacity	Memory Capacity	Product Name	Report Verification			
Computer Reports	Date	Erasure State	Disk Serial	Disk Capacity	Total Memory	Product Name	Report Verification			
Mobile Reports	Date	Erasure State	Erasure Standard Name	Disk Capacity	System Manufacturer	System Model	Mobile Identifier	Mobile Wireless Operator	Operating System	Report Verification
LUN Reports	Date	Erasure State	Erasure Target Serial	Erasure Target Capacity	Erasure Target Vendor	Erasure Target Model	Erasure Target Path	Operating System Computer Name	Report Verification	
File Reports	Date	Erasure State	Erasure Operation Name	Erasure Target path (File)	Erasure Target Capacity	Operating System Computer Name	Operating System Username	Report Verification		
Flash Reports	Date	Erasure State	Erasure Target Serial	Erasure Target Capacity	Erasure Target Vendor	Erasure Target Model	Operating System Computer Name	Report Verification		
Virtual Reports	Date	Erasure State	Virtual Machine Name	Erasure Target Capacity	Host Name	Datastore	Erasure Operation Name	Report Verification		

Using the data from the above table you can create the BMC standard views in the BMP, as well as any new views that you desire.

When you have finished adding all the columns that you want, switch to the Filters Tab. Then under filters, enter whatever filters you require. In the example below, we have selected to only view Blancco Drive Eraser reports in the view.

Create new view

Import

General details Filters

Filter data

Search and add filters to the data in your report view.

Filter	Operator	Value(s)
Product Id	Match	<div> <div>Select</div> <div> <div>Select</div> <div>Blancco Cloud Storage Eraser</div> <div>Blancco Drive Eraser</div> <div>Blancco LUN Eraser</div> <div>Blancco Mobile Diagnostics and Erasure</div> </div> </div>

Clear all

Create

Finally, click on "Create", and a pop up windows "Success" will indicate that you have created a new view.

Success

A new view with name "Computer reports" has been successfully created.

OK

Now under "Our views" you will see a list of views that you have created and you can open the views by clicking on them. It is possible to modify the view after you have created it. Beside the name of the report there are three vertical dots. By clicking on the dots, a menu appears that allows you to edit, export, clone and delete the views.
