

Blanco Management Portal 2.4.1 has been released!

Management Portal 2.4.1 - Release notes

Features:

- Configurable login options:
 - SSO + Email-password
 - SSO Only
 - Email-password only.
 - Login option can now be selected at company level or user level. Default is SSO + Email.
- Open report in new tab.
 - Report can now be opened in a new tab.
- Blanco Mobile Solutions (BMS) - Lease feature support.
 - BMP now supports BMS lease feature.
- UX improvements: several minor updates to UI, responsiveness and mobile screen support.

Bug fixes:

- **BCC-2807** - Adding new user fails with error "Email address not available".
- **BCC-2804** - Unable to fetch default workflow.
- **BCC-2752** - Total Memory should be reported in GB.
- **BCC-2750** - Failing login due to bad date format.
- **BCC-2649** - Disappearing access expiration if you click other tabs within a single window.
- **BCC-2402** - Sending an encrypted report from DE to BMP results to MC_REPORT_UPLOAD_OK.

Known issues:

- **BCC-2758** - Send report by email does not work in this build.
