

License Snapshot

Created date	Updated date	Affects version	Fix version
25 Mar 2024	25 Mar 2024	Management Console - 5.18.0 (and newer)	N/A

Description

Blancco Management Console 5.18.0 introduces a new health feature named "License Snapshot".

This feature compiles essential health data, including license balance and consumption history, transmitting it to our secure Blancco Cloud for effective account management. This information enables our sales account team to better cater to our customers' needs.

A secure, encrypted, snapshot of this data is uploaded to our cloud daily, with no collection of personal information.
