

# Can Windows Phone be erased if the device screen is locked?

Created date	Updated date	Affects version	Fix version
06 Mar 2017	13 Feb 2023		

A Windows Phone device can be erased although the screen is locked.

When the user is prompted to do a factory reset, they should reset the device using the button combination (please refer to manufacturer documentation for more info).

The factory reset removes the screen lock.
