

How to verify report is not tampered with?

Created date	Updated date	Affects version	Fix version
21 Mar 2022	21 Mar 2022	Management Console - All versions Blanco Cloud	N/A

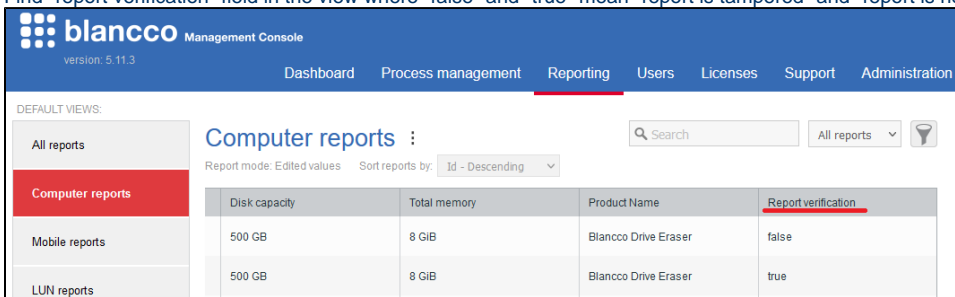

Description

All the reports that Blanco products generate include digital signatures.

The digital signatures are to be verified by Blanco Cloud or Blanco Management Console so that users can identify tampered reports.

Step by step instructions

1. Login to Blanco Cloud or Blanco Management Console.
2. Navigate to "Reporting".
3. Select one of DEFAULT VIEWS in which you are interested. For example, "Computer reports" view.
4. Find "report verification" field in the view where "false" and "true" mean "report is tampered" and "report is not tampered" respectively.

blanco Management Console version: 5.11.3				
Dashboard Process management Reporting Users Licenses Support Administration				
DEFAULT VIEWS:				
All reports	Computer reports :			
Report mode: Edited values Sort reports by: Id - Descending				
Computer reports	Disk capacity	Total memory	Product Name	<u>Report verification</u>
Mobile reports	500 GB	8 GiB	Blanco Drive Eraser	false
LUN reports	500 GB	8 GiB	Blanco Drive Eraser	true

Not only in default views but also in your own view you can add "Report verification" field.

 Find "Report verification" in "Available columns" then move it to "Selected columns" when creating or editing a view like this screenshot.
