# File Eraser

Blancco File Eraser goes beyond today's regular file shredding software to guarantee your files are eliminated with a certified report that achieves true data sanitization requirements. With this report, you prove adherence to algorithm standards specified by the U.S. Department of Defense (Standard 5220.22-M) and 21 other standards, to meet security and regulatory compliance requirements.

With Blancco File Eraser organizations securely wipe sensitive files and folders from PC desktop computers, laptops and servers – either manually or automatically. While typical file shredding or wiping software may delete some data, Blancco File Eraser securely wipes files and folders to comply with the most stringent requirements to ensure that any sensitive data has been securely and permanently erased, certified by the most regulatory bodies and with a 100% tamper proof report.
