

Blancco Management Console version 5.1.0 has been released!

Management Console 5.1.0 - Release notes

Features:

- **MC-5824** - Access Matrix Retrieval.
 - Allows retrieving role and user list from the console in CSV format.
- **MC-5823** - User List Retrieval.
 - Allows retrieving role and user list from the console.
- **MC-5787** - High Availability Support.
 - Supports multiple MCs to run against one database.
 - Customers will use one license container from multiple access points.
- **MC-5594** - IMEI filed to mobile device manual reports.
 - A new input for IMEI is created for manual mobile reports.
- **MC-5870** - Korean Localization Support.
 - UI provided in Korean.
- **MC-4036** - Report export request from UI.
 - Report views can be exported as API report export XML requests directly from UI.
- **MC-5518** - Report View of Created Reports.
 - Allows reports that are created manually in the Management Console to be visible both in pre-defined view and All report view.
- **MC-5592** - Report Archiving.
 - Configuration for archiving reports now available via UI.
 - Allows archiving old reports from MC database.

Bug Fixes:

- **MC-5885** - Summary CSV export does not pick up custom field values.
- **MC-5771** - User move is a little bit slow.
- **MC-5883** - Customer custom field not visible within view editor since 5.0.1 MC update.
- **MC-5822** - License history: unsorted users and groups.
 - Users and groups were not sorted in license history.
 - They should have been sorted alphabetically.
- **MC-5865** - [Cloud.blancco.com](https://cloud.blancco.com) Report by date doesn't sort correctly.
 - Custom report not sorting correctly.
- **MC-5675** - Bootable Asset Report is written before report is being sent/saved if MC remote monitoring is on.
