

I want to test server erasure with RAID dismantling. Can I do it with the free license?

Blancco Driver Eraser (PC Edition) is available through [Blancco Web Store](#) and can also be requested for [free evaluation](#). However, Blancco Driver Eraser (PC Edition) is not the best choice for erasing servers or storage systems as it does not contain the features needed for server erasures, such as RAID adapter support, RAID dismantling functionality or the ability to erase multiple drives simultaneously.

In order to get licenses or evaluation licenses for Blancco Driver Eraser (Server), please contact [Blancco sales](#).
