

What are the minimum system requirements for going through the evaluation process?

The complete evaluation process consists of three parts which have their own "minimum system requirements":

1. Creating the bootable USB stick:
 - Windows based operating system (Windows XP or newer)
 - USB port
 - USB stick
 - Internet connection (required for consuming the evaluation "license")
2. Erasing a system with Blancco Drive Eraser:
 - x86 architecture machine
 - 768 MB RAM memory (preferably 1 GB RAM)
 - SVGA display and VESA compatible video card for graphical user interface
 - USB port (ability to boot from USB)
3. Unlocking the erasure report (optional):
 - Any computer with an Internet browser
 - USB port
 - Internet connection
