

Drive Eraser

Blancco Drive Eraser allows organizations to securely erase sensitive data from HDDs and complex SSDs in desktop/laptop computers and servers in order to safely resell, repurpose, or dispose of drives. Through our patented SSD erasure process, organizations now have a secure method to wipe data on storage devices – regardless of underlying technology – in a cost-effective, secure and eco-friendly manner. Ensure your sensitive data has been permanently wiped from your IT assets with the most certified disk wipe software solution on the market, with a 100% tamper proof report.

- **Product name:** Blancco Drive Eraser

- Verification process / Verification level of 1%

Known Issues

- "Not enough Asset licenses" when saving an erasure report
- Apple SSD is no longer being detected after erasure with Drive Eraser
- Apple SSD werden nach der Löschung nicht mehr erkannt
- Asset Report is not displayed at boot sequence
- Black screen - Blancco Drive Eraser / Blancco 5 hangs while booting
- Boot issues with Blancco Drive Eraser
- Booting Blancco Drive Eraser / Blancco 5 from a CD or USB fails
- Booting Blancco Drive Eraser fails on HP ZBooks
- Die Löschung schlägt fehl, weil das Löschobjekt offline ist
- Drive EraserApple SSD
- Erasing SATA drives in caddies with interposers/adapters
- Erasure does not start (stuck at 0%, error messages, unresponsive software, etc.)
- Erasure failing with Lenovo machines with NVMe drives
- Erasure fails due to Erasure target is offline
- Erasure verification fails
- Fail to save report, USB stick not detected
