Description

Instructions for creating a License Entitlement on the the Blancco Management Portal.

Step by step instructions

Blancco Management Portal-licenses can be transferred to HASP-key licenses and activated to a HASP Key.

Entitlement creation has the following restrictions:

- Entitlement management must be activated by Blancco Support.
- The licenses will be reduced from the Blancco Management Portal account when entitlement is created.
- The user must have a "Manager" role in the Blancco Management Portal.

Entitlements can be created by navigating to the **Management** tab and then to **Licenses and then to License key generation**. This view is used to manage license keys, HASP activation keys and HASP keys.

blancco Management Portal						€ 🦂 EN 🗸 blanccoaus ∨

All licenses	HASP activation	n keys				Add entitlement
License deliveries						
License history	34 result(s) sorted chro 4 Jul 2023, 11:27 Sync now	nologically Last synce	d			Q Search
License key generation	Entitlement ID	Creation Date	Туре	Container	Description	
	908	1 Jun 2018	Softlock update	64697142188		
HASP activation keys	8835	4 Jul 2023	HASP-key upd		Demonstration Entitlemen	it
HASP keys	8410	20 Oct 2022	HASP-key upd	941211283		

Under License key generation there are two options:

- HASP activation keys
- HASP keys

The HASP activation keys option will display a list of HASP activation keys listed.

If the edit-icon at the beginning of the line is clicked (), it opens up the editing window in which the user can edit the entitlement's information. What information can be edited depends on the user's rights.

At the top of the list there is the number of listed entitlements issued and the date of the last synchronization. If the "Sync now" link is clicked, then the entitlement list is force synced from the database.

The information in the HASP activation keys table contains the following information.

Field name	Example	Explanation
Creation Date	17 May 2022	Date of the activation.
Description	100 license added	Description of the action done.
Entitlement ID	1234	ID of the HASP activation entitlement.

Type HL_UPDATE	Type of activation done to the key.
----------------	-------------------------------------

The HASP keys option will display a list of HASP keys .

If the edit-icon at the beginning of the line is clicked (), it opens up the editing window in which the user can edit the entitlement's information. What information can be edited depends on the user's rights.

At the top of the list there is the number of listed entitlements issued and the date of last synchronization. If "Sync now" button is pressed, then the entitlements are force synced from the database.

The information in the HASP keys table contains the following information.

Field name	Example	Explanation
Container ID	1234567890	Container ID for the HASP Key
Creation Date	17 May 2022	Date of the activation.
Туре	HASP Key	Кеу Туре
Name	Company XX	Entitlement Information

To create a new entitlement, under the **HASP activation keys** view, click the **Add Entitlement** button. A window will open that will allow you to choose the type of activation that you wish to create, choose the HASP-key update option for a physical HASP and Softlock update for a software container that might be in a virtual environment. You can add a description of what the licenses will be used for and you can then add the required type and number of licenses at the bottom. If required, more than one license type can be added at the same time.

After completing your choices, click the Create button and after a short time you will see the following message:

A new entry will now appear in the list of HASP activation keys, and an email will be sent to the Profile Account. The profile account email can be viewed by clicking on the Account Name at the top right hand side of the Blancco Management Portal.

Once you have received the email, you can follow the process for EMS Activation to a HASP Key.
