

Sending reports when creating Drive Eraser workflows

Created date	Updated date	Affects version	Fix version
11 Sep 2023	11 Sep 2023	Drive Eraser	N/A

Description

When working with Blancco Drive Eraser Workflows an explicit item needs to be added to send a report to the Blancco Management Portal or Blancco Management Console.

Recently there has been some confusion between Blancco Drive Eraser and Blancco Mobile Diagnostics and Erasure software, as there is a checkbox to ensure a report is always sent within the latter. Such option doesn't exist in Blancco Drive Eraser workflows.

Blancco Mobile Diagnostics and Erasure:

Version: 4.15.0

0
Connected

Workflow

Name:
Workflow name

☐ Automatically start when device connected

☐ Restore device state from Blancco Management Portal when process flow starts

☒ Keep running flow even if device disconnects

☒ If this is not a Subflow, always send updated report when flow ends

☐ Send messages to server when device state changes (these are sent outside normal process flow)

Description:

Blancco Drive Eraser:

Version: 7.7.0

☒ Report in the XML

Step by step instructions

To send a report in Blancco Drive Eraser workflows a "Send Report" item must be added in every possible path in which you want a report to be sent.

For example, in the workflow below, there are send report items after an erasure attempt for both the green success path and the red failed path to make sure report is always sent.
