Using the data from the above table you can create the BMC standard views in the BMP, as well as any new views that you desire.

When you have finished adding all the columns that you want, switch to the Filters Tab. Then under filters, enter whatever filters you require. In the example below, we have selected to only view Blancco Drive Eraser reports in the view.

Create new view ✕

[Import](#)

[General details](#) **[Filters](#)**

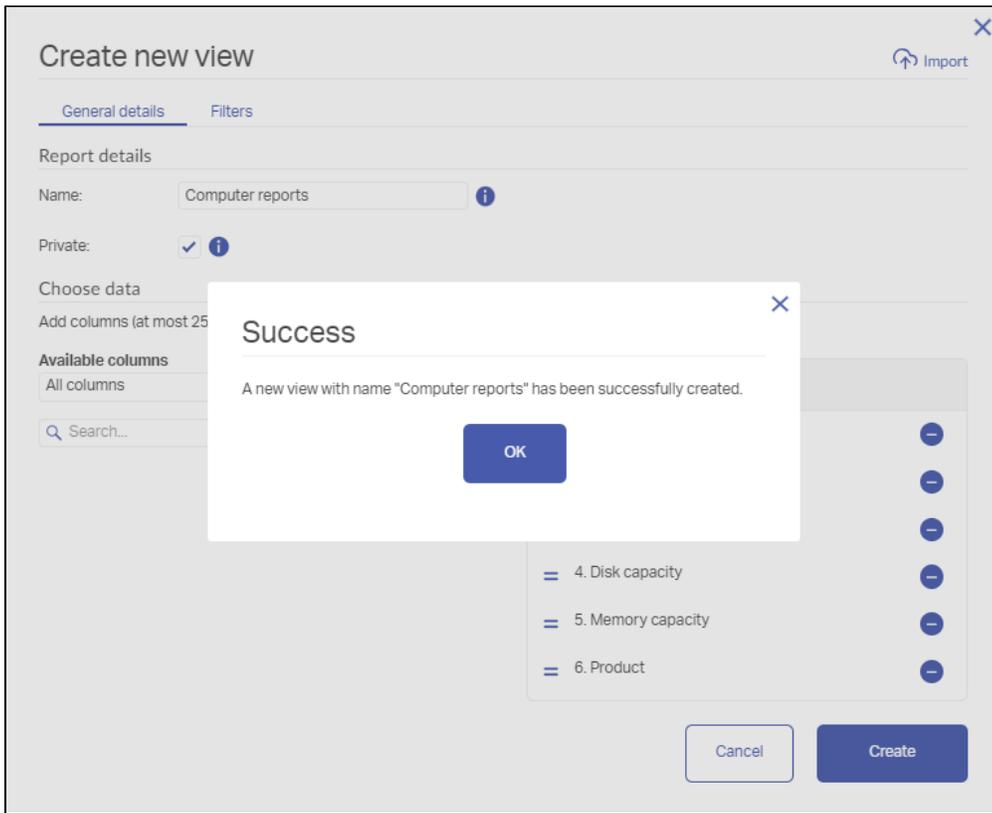

Filter data

Search and add filters to the data in your report view.

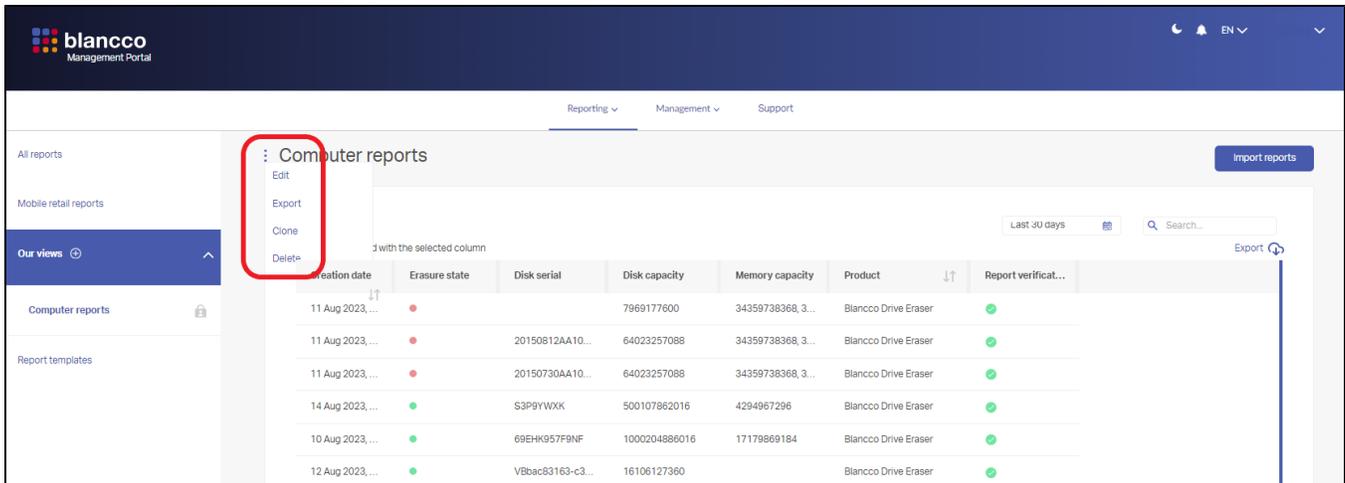

Filter	Operator	Value(s)
Product Id	Match	<div style="border: 1px solid #ccc; padding: 2px;"> Select <ul style="list-style-type: none"> Select Blancco Cloud Storage Eraser <li style="background-color: #007bff; color: white;">Blancco Drive Eraser Blancco LUN Eraser Blancco Mobile Diagnostics and Erasure </div>

Clear all Create

Finally, click on "Create", and a pop up windows "Success" will indicate that you have created a new view.

Now under "Our views" you will see a list of views that you have created and you can open the views by clicking on them. It is possible to modify the view after you have created it. Beside the name of the report there are three vertical dots. By clicking on the dots, a menu appears that allows you to edit, export, clone and delete the views.

Repeat this process until you have all the views that you need.
