

API documentation

This page gathers all the Management Console API related materials into one place. If there is something API related that you are not able to find from this page, please contact Blancco Technical Support team by [creating a Support Incident ticket](#).

Video: Management Console - API: Export reports as XML or CSV with API (5min 59sec): This video contains good basic information for understanding how Blancco API can be used and it contains a basic example.

MC API Integration Package: Example scripts, sample requests and reports, report column values:

- This package contains files always for the latest Management Console release. Check the current version from the [Blancco Management Console page](#).
- Integration packages for older versions should be requested from the Blancco Technical Support team.

Generic Blancco Management Console documentation: User manuals, videos, KB/FAQ articles.

Two Way Communication Setup Guide for Blancco Drive Eraser: Basic information how to get started with the Two Way Communication between Management Console and Drive Eraser.

(Open API documentation is only available to view online)
