

Blanco Management Portal 2.4.0 has been released!

Features:

- Single Sign-On.
 - Customers can now use SSO login for BMP.
 - SSO can be configured using SAML 2.0 or OpenID Connect.
- Custom roles.
 - Customers can now set custom user authorities in BMP. E.g. view reports only, consume licenses etc..
- Summary report.
 - BMP can now export summary reports in PDF & CSV formats.
- Channel Partner Support (Additional levels of subtenants).
 - Tenants can have 3 level of subtenants under them.
- Elastic Search alias.
 - To improve reporting feature performance.

Bug Fixes:

- **BCC-2671** - API error code 500 "Fetching keys failed".
- **BCC-2652** - Report export fails with IndexOutOfBoundsException.
- **BCC-2605** - Workflows with "username": null cause troubles in Drive Eraser end.
- **BCC-2579** - Add Logo is not available.
- **BCC-2382** - EMS entitlement: "Unable to create entitlements. Please contact Blanco".
- **BCC-2342** - Problem with the reports into the Management Portal.
