

Blancco Drive Eraser v7.10.0, Blancco Drive Verifier v7.10.0 and Drive Eraser Configuration Tool v3.10.0 have been released!

Drive Eraser 7.10.0, Drive Verifier 7.10.0 and Configuration Tool 3.10.0 - Release notes

Features:

- **ALBUS-10441, ALBUST-1304, WFE-298** - Play a sound when the erasure of a drive completes.
- **ALBUS-10835, WFE-296** - IBR workflows, "Server Message": support DELETE method.
- **ALBUS-10685, WFE-295** - IBR workflows, "Server Message": support PUT method.
- **ALBUS-10836, WFE-297** - IBR workflows, "Server Message": support PATCH method.
- **ALBUS-9211, ALBUST-1308** - Support for FC-NVMe connected to FC HBAs (NVMe over Fabrics).
- **ALBUS-10833, ALBUST-1309, WFE-301** - IBR workflows, "Erase": ability to put an erased drive in a verifiable state.
- **ALBUS-9707, WFE-299** - IBR workflows, "Create Custom Erasure": ability to define a custom overwrite.
- **ALBUS-9594, WFE-287** - IBR workflows, "Save Issue Report" workflow action.
- **ALBUS-4229** - Identify report exceptions with a unique numeric code.
- **ALBUS-6091, ALBUST-1314, WFE-302** - Allow enabling or disabling the "Write Same" command.
- **ALBUS-8856** - Chromebook support, integrate DHCP server in BDE.

Improvements and Bug fixes:

- **ALBUS-11088** - IBR workflows, fix for a problem with the "Question" action default selection focus.
- **ALBUS-10987** - Fix for a problem where the "Automatic Report Backup" was triggered right after hardware tests were finished.
- **ALBUS-10899** - Fix for a problem where Sanitize Overwrite on ATA drives failed due to a timeout.
- **ALBUS-11025** - Fix for a bug where the connection to BMC failed if the network settings were configured at the same time from the UI.
- **ALBUS-11056** - Improved support for special characters on Wi-Fi SSIDs and passwords.
- **ALBUS-10924** - Fix for a problem where the Battery Discharge Test was possible with a connected charging cable (e.g., on HP 250 G7 Notebook PC or HP 15 Notebook PC).
- **ALBUS-10903** - Fix for a bug with the CT "Reconfigure controller mode" setting (the "No, skip" value and timeout were ignored).
- **ALBUS-10999** - The screen resolution is now reported for all machines (was not reported on "Detachable" and "Tablet" chassis types).
- **ALBUS-10933** - Fix for a bug where the recovery partitions were selectable for erasure even when the "Preserve recovery partition" setting was enabled.
- **ALBUS-10953** - Better handling of IBR workflow names.
- **ALBUST-1217** - CT: Hardware Tests can be selected or deselected with Ctrl+A.
- **ALBUST-1261** - CT: Erasure standards can be selected or deselected with Ctrl+A.
- **ALBUST-1309** - CT: The "NIST 800-88 Clear" erasure standards supports overwriting patterns of 1-4 bytes.
