

Blancco Management Console version 5.18.0 has been released!

Autopilot detection feature will be fully available May 1st 2024 requiring below components:

- Blancco Management Portal account
- Blancco Drive Eraser 7.11.0 (or newer)
- Blancco WinBuilder
- Intelligence Business Routing
- "Endpoint Management Check" license
- If on-premise Blancco Management Console is being used version 5.18.0 (or newer) is required.

For more detailed information about the licensing and pricing contact your Blancco Sales Representative.

Features:

- Process Management API - Extends remote management capabilities via API (e.g. pull issue reports)
 - Enables remote use of BMC
- License Snapshot - Communicates license balance and consumption history to our secure Blancco Cloud for effective account management.
 - This information enables our sales account team to better cater to our customers' needs.
- Autopilot Detection Gateway
 - Supports the Blancco Autopilot Detection capability by providing a gateway to the cloud detection service.
- Group and License Pool Migration
 - The BMP update tool now supports moving subgroups and license pools.
