Blancco Management Portal 2.5.0 has been released!

Management Portal 2.5.0 - Release notes

Autopilot detection feature will be fully available May 1st 2024 requiring below components:

- Blancco Management Portal account
- Blancco Drive Eraser 7.11.0 (or newer)
- Blancco WinBuilder
- Intelligence Business Routing
- "Endpoint Management Check" license
- If on-premise Blancco Management Console is being used version 5.18.0 (or newer) is required.

For more detailed information about the licensing and pricing contact your Blancco Sales Representative.

Features:

- User Groups - Management
    - Allows grouping of users into groups
- License Pools
    - Allows pooling volume licenses. Can assign pools to users.
- Delete Reports
    - User can select and delete unwanted reports
- Deleting Tenants
    - Designated Blancco user can now delete a Tenant in BMP
- Device Autopilot Detection Service
    - Enables the autopilot detection feature
- UI based configurations for Blancco Mobile Solutions setup on BMP

    - Enables easy onboarding of BMS customers on BMP
- UI Enhancements and Tweaks
    - Bunch of minor UI improvements

Bug fixes:

- **BCC-2819** - User unable to access the BMP
- **BCC-2988** - Logo upload failed
- **BCC-3040** - Columns names for hardware tests show only as 'Test' instead of the actual test names
