

# Blancco PreInstall 3.1 is now released!

## Preinstall 3.1 - Release Notes

Autopilot detection feature will be fully available May 1st 2024 requiring below components:

- Blancco Management Portal account
- Blancco Drive Eraser 7.11.0 (or newer)
- Blancco WinBuilder
- Intelligence Business Routing
- "Endpoint Management Check" license
- If on-premise Blancco Management Console is being used version 5.18.0 (or newer) is required.

For more detailed information about the licensing and pricing contact your Blancco Sales Representative.

### Features:

- **LEE-4829** - Collect machine information for Autopilot detection
  - Ability to gather machine information from the running machine, the data is then sent to a configured BMC or BMP (Blancco Management Portal) account for detecting the Autopilot status.
