

# Drive Eraser Configuration Tool version 2.3 has been released!

Configuration Tool 2.3 - Release notes:

Features:

- **ALBUST-425** - Ability to configure Fingerprint in a sector < 200.
- **ALBUST-426** - Ability to configure "flr=disabled" as a customized booting option.

Fixes:

- **ALBUST-421** - Fix for an issue where Image Configuration Tool drops FLR kernel command.
- **ALBUST-422** - Fix for an issue where mandatory value prevents saving and sending erasure report although all fields have values.
- **ALBUST-423** - Fixed Help-button which was pointing to old user manual.
- **ALBUST-424** - Fix for an issue where changing the default booting option does not display it in the splash screen.
