

Blancco PreInstall version 2.5.0 has been released!

Preinstall 2.5.0 - Release notes

Features/Improvements:

- **LEE-1229** - Improvements for Windows product hardware report.
- **LEE-1512** - Possibility to make Preinstall to load DE ISO with memdisk.
- **LEE-1590** - Add Windows user name to DE custom fields.
- **LEE-1356** - Support for UEFI Secure Boot.

Bug fixes:

- **LEE-964** - Fixed an issue where only generic error message and error code (100003) is shown if user attempts to install PreInstall twice.
- **LEE-965** - Error message 110004 while installing PreInstall. Error message is caused by insufficient user privileges.
- **LEE-1397** - Fix for an issue where rebooting the computer too soon doesn't write required configuration to the device.
- **LEE-1398** - Fix for an issue where UEFI boot menu has Windows entry that doesn't work.
- **LEE-1399** - Fix for an issue where Preinstall causes errors 110004 and 100003 on HP 800 G2 machines.
- **LEE-1457** - Fix for an issue which caused hardware report's connector type to have semicolon at the end of the field.
- **LEE-1461** - Fix for an issue where hardware report is not working in WinPE.
- **LEE-1598** - Fix for an issue where Preinstall program is not responding when creating partition.
- **LEE-1535** - Fix for an issue where partition creation fails if there is unallocated space larger than Preinstall creates already available.
