

Blancco Mobile Device Eraser 3.7.2 is now released!

Mobile Device Eraser 3.7.2 - Release notes

Bug fixes:

- **PHEN-3076** - Enhanced client hardware support.
 - Support for latest hardware (Coffee Lake) is added.
 - There is now an alternative kernel that can be accessed by changing change vmlinuz to vmlinuz_latest in the bootloader.
 - More details available here: [How to change the kernel version used in Mobile Diagnostics and Erasure](#)
- **PHEN-2983** - Synchronization server fixes.
 - Multiple fixes to the sync server functionality.
 - The client stopped synchronizing the setting is a correct way.
- **PHEN-3088** - Auto proxy settings incorrectly used.
 - The auto proxy settings was used incorrectly when multiple proxys was given.
- **PHEN-3063** - iPod Touch camera test fail.
 - iPod Touch Gen 5 and 6 do not have cameras and therefore this test will always fail.
 - This test is now filtered out and camera test will not be performed for these devices.
- **PHEN-3010** - Diagnostic timeout setting could not be reset to default.
 - After set they could not go back to default values automatically.
- **PHEN-2378** - Battery in Asus Zen Pad not detected.
