## **Blancco Mobile Diagnostics and Erasure - Remote Support** Tool

BMDE Remote Support Tool can be installed on a Windows machine in order to remotely control a Blancco Mobile Diagnostics and Erasure -station.

In order to start using the Remote Support Tool download and install the tool to a Windows machine and set up the connection from the Blancco Mobile Diagnostics and Erasure. Once you have the settings configured, BMDE client machines are capable of calling in to the Remote Support Tool where you can accept the remote connection.

If you have issues establishing the connection, make sure that traffic on TCP port 15911 is allowed on your network.
