

Blanco Management Console version 5.1.1 has been released!

Management Console 5.1.1 - Release notes

Bug fixes:

- **MC-5943** - License history information.
 - When logged to the Cloud, occasionally some of the users were able to see the license consumption history intended for other users which were also working with the same view at the same time.
- **MC-5957** - Update doesn't notice that Elasticsearch is in use.
 - During update of MC from 5.1.0 with Elasticsearch to 5.1.1 RC installer requests for Elasticsearch details.
 - Installer should not have requested for the details as Elasticsearch is already into use.
