Blancco LUN Eraser (for Windows) version 2.4 has been released!

LUN Eraser (for Windows) version 2.4 - Release notes

Important: Due to a new report digital signature, the Blancco LUN Eraser (for Windows) releases version 2.4 and higher are not compatible with the Blancco Management Console 4.7.1 or lower (report importing and sending will fail consistently).

- If you are using a local BMC and want to use Blancco LUN Eraser (for Windows) version 2.4 or higher, please upgrade first to BMC 4.8.0 or higher.
- If you are using the Blancco Cloud, it is fully compatible with Blancco LUN Eraser (for Windows) version 2.4 and higher.
- The BMC 4.8.0 and higher are fully compatible with all Blancco LUN Eraser releases (< 2.4 and >= 2.4).

Features:

- New In Progress report.
  - When an erasure is initiated a report is generated locally and sent to BMC.
- AGISM Erasure Standard.
  - Added new erasure standard.
- Added support for LDK licensing.
- Display verification percentage on report.
- New state of the art digital signature for reports for added security.
  - Due to the introduction of this new signature, BMC 4.8 or greater is required.
- Unify Erasure Standards naming.
  - Erasure standards names should match all other Blancco products.

Bug Fixes:

- **LEE-2147** - Incorrect serial number shown.
  - Fixed some cases where the serial number is not shown accurately.
- **LEE-1737** - Unable to erase HDD larger than 10TB.
  - Increased the size limit for HDD licensing to 20TB
