

Blanco Mobile Diagnostics and Erasure 4.3.3 is now released!

Mobile Diagnostics and Erasure 4.3.3 - Release notes

Features/Improvements:

- **PHEN-4882** - Skip Android PlayProtect Dialog
 - BMDE can now skip the Android PlayProtect pop-up message.
- **PHEN-5276** - Replace and Delete Existing Workflows & Layouts from Client Machine
 - Ability to remove existing workflow while syncing updated workflow from Sync Server if 'Strictly follow server' is checked in SyncServerClient settings. If not then keep local workflow.
- **PHEN-5298** - Russian Keyboard
 - Russian keyboard layout added.
- **SD-3999** - "Dark Mode" Characters
 - Make characters on diagnostic report screen readable in "Dark Mode"

Bug fixes:

- **PHEN-5036** - Asus P00J ZenPad Z8s Erasure Failure
- **PHEN-5355** - App Won't Install on Phone
- **PHEN-4853** - Incorrect diagnostic test set runs on the device after specifying the correct one via the workflow
- **PHEN-4655** - Incomplete model reported for iPhone 8 128GB and some iPhone X models

Known issues:

- There's known issue in workflow's comparison and set value items that leading zeros get removed
- On Client stations Diagnostics test sets always strictly follow the Server settings no matter strictly follow is enabled or not.
- Browser bookmark remove button (admin mode) does not work yet.
- Printer settings checking might cause eraser setting view opening slow
- Login view and System settings Russian keyboard ctrl + tab hot-swap to "us" and back to "ru" does not work
- **PHEN-4115, PHEN-4118** - Auto Enable of USB Debugging Mode" feature to work on most devices. To be fixed in an upcoming release.
