Download: Blancco HASP Tool

Blancco HASP Tool is a standalone Windows software that can be used for viewing local HASP key license information and for activating new HASP license codes (.hsp files).

1. Connect a Blancco HASP key to a computer's USB port.
2. Wait for the computer to install the drivers for the HASP key (the red light should stop blinking after the drivers are installed).
3. Download the Blancco HASP Tool software.
4. Unzip the package and run the software ("Run as Admin...").
5. Read the user manual for more detailed instructions.
