

Blancco PreInstall 2.8.1 is now released!

Preinstall version 2.8.1 - Release notes

Features:

- Support Windows updates.
 - PreInstall will no longer block certain Windows updates and will be temporarily deactivated during updates.
- Added a new Launch Script.
 - Added an easy configuration and launch script.
- Added option to consume a Blancco Drive Eraser configuration xml.
 - This saves the user from having to use the Blancco Configuration Tool for updating the configuration.
- Added support for non ascii ISO file names.
- Added help text option.

Fixes:

- **LEE-2769** - Error Code 130015.
 - Added a test to check if diskpart exists and is allowed by the system.
- **LEE-2019** - Fix for restore function not always working.
- **LEE-2442** - Error 100026.
 - Optimization for partition shrinking and count check.
