

# Blanco Mobile Diagnostics and Erasure 4.5.1 is now released!

Blanco Mobile Diagnostics and Erasure 4.5.1 - Release notes

## Features:

- In this release there's support added for iOS 14.2 and iOS 12.4.9 as well as new devices such as iPhone 12 and iPad 8th gen/iPad Air (4th gen).
  - This release must be used in order to be able to erase iOS devices with iOS 14.2 firmware.

## Bug fixes:

- **PHEN-5975** - Unable to Process iPhone 12 Models.
- **PHEN-5996** - BMDE 4.5.0 - Server Message Response handling changed.
- **PHEN-6015** - After updating BMDE to the latest version (4.5), some iPhone models were failed and went into recovery mode. Some devices failed to recover after erasing.
- **PHEN-5985** - Workflow: one variable turned from 1 to 0.
- **PHEN-5898** - Unable to detect iPad 8 - MYLD2LL/A.
- **PHEN-5835** - iPad 8 failed to connect.
- **PHEN-5886** - iPad won't start process with ghost SIM.
- **PHEN-5978** - New iPhone 12 Fails to capture Camera SNs.
- **PHEN-5891** - Factory reset verification doesn't work on Crosscall model.

## Known Issues:

- When running Diagnostics and Functional tests for the new devices there are few tests like Face ID, Silent key for which the filtering is not yet in place - those will be fixed in later release.
- OEM serials matching will be enhanced in later release for the new devices.
