

Blanco Management Console version 5.7.0 has been released!

Features:

- **MC-6574** - Customers able to disable the product usage statistics via UI
- **MC-6511** - Configurable maintenance notification via UI.
 - Stand-alone BMC displays maintenance notifications on the login screen if there will be any planned.
- **MC-6512** - Signed Authentication Request support with SAML
- **MC-6447** - User and group filtering of license history with view only user hierarchy authority.

Bug fixes:

- **MC-6585** - Dashboard Processed Devices widget shows all BNDE device models as other.
 - BNDE device model information did not show up in Processed Devices widget's summary sections.
