Blancco PreInstall 2.9.0 is now released!

PreInstall 2.9.0 - Release notes

Features:

- Added more explicit error messages, improved logging and exit codes for command line execution.
    - This should help understand how to resolve or report issues.
- Documented Windows registry settings.
    - All supported registry settings for configuring Drive Eraser are documented in the user manual.
- Improve windows update handling.
    - Preinstall will automatically deactivate and change partition type during updates.
- Updated TLS verification.
    - Certification check is on by default, use DoNotVerifyCertificates in registry to turn it off

Bug fixes:

- **LEE-2900** - HP ProBook G430 G1 does not boot from Preinstall
- **LEE-2796** - Unable to create MSI package with wixeditor.
    - Fixed a compilation issue that broke wixeditor support in 2.8.1.
