

# Blancco Management Console version 5.9.0 has been released!

Management Console 5.9.0 - Release Notes

## Features:

- **MC-6683** - Fetch multiple issue reports when issue arises on multiple machines.
  - Bulk fetching of issue reports has been introduced for remote erasure clients.
- **MC-6682** - Selectable values from Process Management Tab.
  - Values can be now selected from remote erasure tables.
- **MC-6605** - Show client machine IP addresses in the process management tables.
  - Showing IP and MAC addresses have been added as an optional new columns into remote erasure tables.

## Bug fixes:

- **MC-6694** - Summary PDF with NIST800-88 Purge-NVMe: Erasure method explanation not available.
  - Lacking erasure standard description has been added.
- **MC-6666** - Vulnerability - Clickjacking: CSP frame-ancestors missing.
  - Frame-ancestors 'self' header has been added to all responses in order to fix the vulnerability.
- **MC-6665** - Vulnerability - Error messages.
  - Error messages are not anymore leaked when malformed URLs are invoked.
