

# Blancco Mobile Diagnostics and Erasure 4.8.1 is now released!

Mobile Diagnostics and Erasure version 4.8.1 - Release Notes

## Features:

- **PHEN-7135** - Android Device Cards/Icons disappear after erasure.
- **PHEN-7221** - BMDE screen goes black after printing and USB disconnect.
- **PHEN-7213** - iOS activation fails for unknown reason.
- **PHEN-6480** - New version failed to copy - update to 4.6.1 failed.
- **PHEN-7166** - Unable to process Poco X2 device
- **PHEN-7290** - Add option to wait for welcome screen after iOS erase.
  - This is a new option in the iOS erasure options settings which can speed up device initialization in some cases.
  - More details will be added to the next BMDE manual update with the release of 4.9.

## Important Information and Known Issues

- Device cards are more sticky. Once device process is ready, either use 'x' button to remove a device card from UI or use dismiss option via Execute button to remove multiple device cards at once.  
<https://support.blancco.com/display/KB/Clear+Device+cards+from+Blancco+Mobile+Device+Diagnostic+and+Erasure+UI>
- In Slot view, if device card for processed device is not removed from UI and a new device is connected to same USB slot, focus of the device is not working - device must be reconnected.
- In workflow avoid using iOS activation and iOS setup modules in a row.
- Client status on status panel is shown connected if Synchronize firmwares is enabled in sync settings else fail status can be seen.
