Blancco File Eraser (for Windows) 8.5 has been released!

File Eraser for Windows version 8.5 - Release notes

Features:

- Separated license IDs for BMC activation.

    - Blancco File Eraser - Home Edition: 27
    - Blancco File Eraser - Data Center Edition: 28
    - Blancco File Eraser - Enterprise Edition: 44
- Windows Server 2016 and 2019 support.
- Activate MC license without UI interaction.

    - Added a /activate command for license activation
- License file for offline licensing.

    - This removes the need for new custom installers for offline packages.
- Smaller installer package.

    - Optional smaller package with limited features.
- Update dialog is now disabled by default.

    - To enable update dialog, please change the HideUpdate registry value

Bug fixes:

- **LEE-2071** - Folder selection issue.

    - Folders can now be selected again from the UI
- **LEE-2875** - Restricting the report content.
    - Reactivated the registry options to restrict the report content
- **LEE-3138** - .aaa file left in network folder.
    - Fixed a rare issue with a shadow file being left after erasure in network folders.
- **LEE-3159** - Loglevel target issues.

    - Fixed loglevel command issues
- **LEE-3485** - MC license activation hangs.

    - This was happening when a non admin user attempted to activate the license.
