

Blanco Mobile Diagnostics and Erasure 4.10.1 is now released!

Mobile Diagnostics and Erasure 4.10.1 - Release notes

We have updated our Apple Provisioning Profile in our diagnostic applications. The profiles in BMDE 4.9 and earlier will expire at the end of the day on February 21st. Customers who wish to continue performing diagnostics on Apple devices **MUST** update their machines to BMDE 4.10 (or newer) by no later than February 21st, otherwise they will no longer be able to process their devices.

This is a fix release for iOS/iPadOS15.3. Release also contains fixes for popup handling in views as well as enhancements to Diagnostics Auto-launch and iOS setup functionality.

Bug fixes:

- **PHEN-7785** - Lock Check Failed error happening randomly for iPhones/iPads.
- **PHEN-8099** - Popup loses focus.
- **PHEN-8131** - Popups overlap in box item based views.
- **PHEN-8117** - Unable to perform diagnostics - Profiles not installing correctly/errors.
