Blancco Network Device Eraser 2.7 is now released!

Network Device Eraser 2.7 - Release notes

Features:

- UI/UX Improvements.
  - Tray icons to indicate BMC connection and License availability.
  - BNDE window close warning dialogue.
  - Config settings terminology simplified.
  - View report functionality – formatted report/s can be viewed from BNDE.
- Licensing Improvements.
  - Erase the same devices without consuming another license per device connection.
- Load OS Improvements.
  - Load OS button functionality can now be used in "Normal Mode".

Bug fixes:

- Erasure failed / could not complete.
  - Cisco 4331 regex issue.
- BNDE lists only 1 device when ACS Genie is run on a virtual machine on the same host.
- Management Console setting not taking IP address (on premise BMC).
- Device Not Supported | Cisco C2950-I6Q4L2-M V12.1(22)EA4
- **BNDE-824** - Device without OS not getting selected through port button after erasure.
- **BNDE-814** - Spacing issue in UI report.
- **BNDE-810** - Tooltip message gets displayed even after successful erasure upon multiple attempts.
- **BNDE-782** - Inaccurate message for management console address when port number is not input.
