

Blancco Xcelerate

Blancco Xcelerate Hardware is an appliance which is an All-in-one solution for diagnosing and erasing mobile devices. It is purpose-built for small/medium mobile processors and wholesalers who require a hardware and software solution to process any volume of devices quickly before they enter the second-hand market.

Blancco Xcelerate uses the Blancco Mobile Diagnostics and Erasure (BMDE) software to process the devices.

For more in-depth information on how to use the software, please refer to full the Blancco Mobile Diagnostics and Erasure user manual and documentation.

Any hardware related knowledge articles and known issues can be found below this section.
