Description

This article will provide you with the steps on how to collect license history from BMDE machine

Step by step instructions

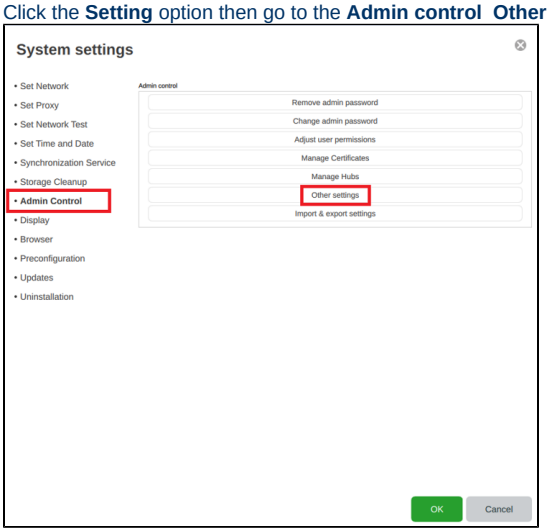
BMDE License history:

It keeps license history in BMDE host local drive. It can be exported to CSV files so that users are able to trace the activity.

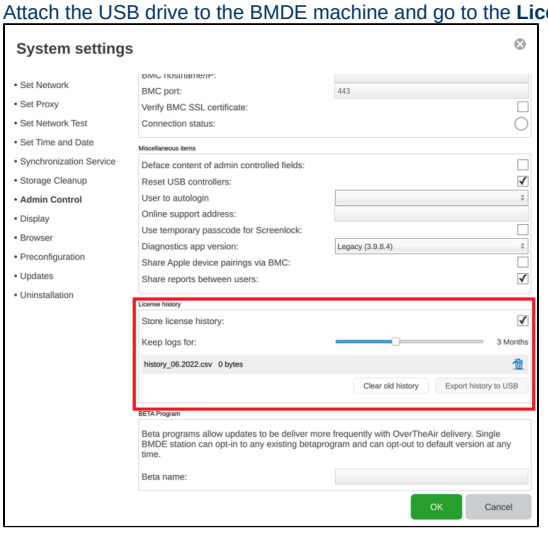
- **Store license history** - When enabled, the user can specify how many previous month logs are stored (1-6 months, default value 3 months).
- To remove log files, click on the trash-icon next to the log file name.
- **Clear old history** - Remove all log file histories older than the specified time.
- **Export history to USB** - Export all log history to the connected USB drive.

Please refer to the below-attached screenshots.

1. Click the **Setting** option then go to the **Admin control Other settings**



2. Attach the USB drive to the BMDE machine and go to the **License history.**



3. Click "OK"
