

How to transfer licenses from Blancco Cloud account to HASP-key

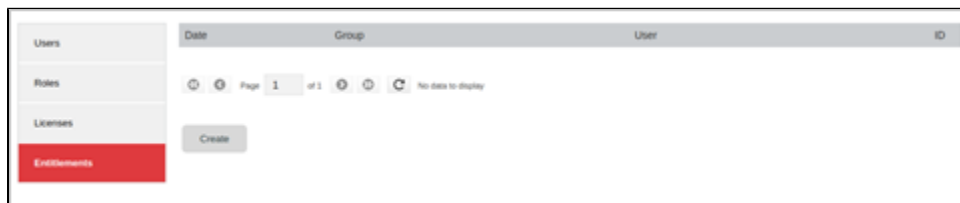

Created date	Updated date	Affects version	Fix version
18 Apr 2022			

Blancco Cloud-licenses can be transferred to HASP-key licenses and activated to a HASP dongle. Entitlement management is only available to managers and the managers can see all the entitlements which are active for the current account ID.

Entitlement creation has the following restrictions:

- HASP-key(s) where licenses are going to be activated needs to be compatible with the new licensing schema.
- Entitlement management must be activated for the account(s) by Blancco.
- Licenses must be individual licenses.
- The licenses will be reduced from the Cloud account when entitlement is created.

Entitlements can be created by navigating to **User and licensing** -tab and then to **Entitlements**.

To create an entitlement, click on **Create**. This brings up the **Create new entitlement** view:

A screenshot of a 'Create new entitlement' dialog box. It has a title bar with a close button. Inside, there is a section titled 'Licenses' with a message 'Created entitlement and its licenses will expire 2017-07-01.'. Below this, there is a 'Clear all' button and an 'Add license' dropdown menu. At the bottom, there are 'Create' and 'Cancel' buttons.

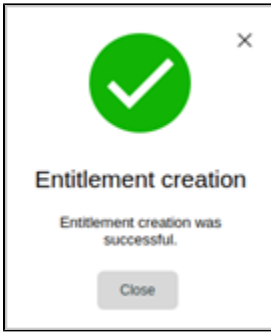

Select a license from the **Add license** dropdown-menu. Now select how many licenses you wish to assign, by entering the number of licenses to the "Amount to assign" field. More licenses can be added by using the **Add license** menu.

A screenshot of the 'Create new entitlement' dialog box. It shows the 'Licenses' section with a message 'Created entitlement and its licenses will expire 2017-07-01.'. Below this, there is a list of licenses: '1. Blancco Mobile Device Eraser - Erasure' with 'Available: 100'. To the right of this list is an 'Amount to assign' field with the value '10' and a plus icon. There is also an 'Add license' dropdown menu. At the bottom, there are 'Create' and 'Cancel' buttons.

When ready, press **Create** to create an entitlement. A confirmation window will popup. Press **Create** to confirm the creation of the entitlement and consumption of the Cloud-licenses to create licenses entitled to HASP licenses. **NOTE! Consumed licenses cannot be transferred back to Cloud-licenses.**

A screenshot of a confirmation dialog box titled 'Create new entitlement'. It contains the text 'Entitlement creation will consume the assigned amount of licenses. Are you sure you want to continue?'. At the bottom, there are 'Create' and 'Cancel' buttons.

Once the licenses have been consumed and the entitlement has been successfully created, the following window is shown:

Now the created entitlement can be seen on the **Entitlements** main view. The entitlement item shows the entitlement creation date (Date), the group it was created for (Group), user who created it (User) and the ID of the entitlement (ID).
