

Blanco Mobile Device Eraser 3.3 is now released!

Blanco has released Blanco Mobile Device Eraser (BMDE) version 3.3. The update is available via Blanco's OTA (Over-The-Air) download server, by downloading and updating the version straight from the Blanco Mobile Device Eraser software over internet connection. The release notes can be found below.

To update the BMDE software from a previous version, log out and log in to BMDE to trigger the OTA check/download, then click the status bar download icon to install the update once it has finished downloading. After installing, restart the BMDE software to reboot to the updated version.
