

Offline EMS license activation to a HASP key

Created Date	Updated Date	Affects version	Fix version
19 May 2021	25 May 2021	N/A	N/A

To activate the new Blancco Erasure Software licenses you will receive an email, which contains the product key(s) for the activation. The email also includes steps how to activate your product key(s). You can choose online or offline activation. Online activation requires an Internet connection and a HASP-key needs to be connected to the machine where activation will be done. Offline activation doesn't require internet connection, but you will need to generate a request file (C2V-file) and upload it to the License Activation Portal. After uploading the file, you will receive a response file (V2C-file) which can be activated to the HASP-key without internet connection.

This guide is for Offline activation, for Online activation see the article "[Online EMS license activation to a HASP key](#)". For activating license through your local Blancco Management Console (3.6.1 or newer) see the article "[Offline EMS license activation with Blancco Management Console](#)".

Note! For offline activation you will need:

With RUS Tool

- Windows Operating System
- RUS_MOXZM Windows tool
- Sentinel HASP/LDK Run Time.
 - Have to be installed before running RUS tool.
 - Drivers can be downloaded from [Thales download site](#).

Without RUS Tool

- Sentinel HASP/LDK Run Time version 7.90 or newer.
 - Drivers can be downloaded from [Thales download site](#).

Without RUS Tool

1. Enable "Generate C2V File for HASP key" in Sentinel Admin Control Center, <http://localhost:1947> page. This step has to be done only once, if it's already enabled, continue step 2.
 - a. Navigate to "Configuration" page

- b. Locate "Generate C2V File for HASP key" option and enable it.

Generate C2V file for HASP key	<input checked="" type="checkbox"/> Enable this option only if recommended by your software vendor.
--------------------------------	---

2. Navigate to "Sentinel Keys" page and press C2V button under "Actions" for generating C2V file.

Sentinel Keys Available on blgfi-158							
#	Location	Vendor	Key ID	Key Type	Configuration	Version	Sessions Actions
1	Local	MOXZM (871020)		Reserved for New SL Key	SL	-	- [Fingerprint]
2	Local	MOXZM (871020)		HASP HL Time		3.25	- [Products] [Features] [Sessions] [Blindon] [C2V]

3. Upload the C2V-file to the "Generate License" window and click "generate"

5. Go to Sentinel Admin Control Center "Update/Attach page and Apply downloaded V2C file.

gemalto

Options

Update/Attach License to btgfi-158

Apply File

Select a V2C, V2CP, H2R, R2H, H2H or ID file:

Browse... No file selected.

Apply File

Cancel

The following file types can be applied:

- A V2C file contains a license update from your software vendor, or a firmware update for your Sentinel HL keys.
- A V2CP file contains license update package from your software vendor.
- An H2R file contains a detached license.
- An R2H file contains a cancelled detached license (to be re-attached to its original key).
- An H2H file contains a rehosted protection key.
- An ID file contains the identifiers of the Sentinel License Manager on a remote machine (occasionally required for creating a detached license).

With RUS Tool

1. Access the License Activation Portal (the link is in the email)

- 2. Log in by using your unique product key found in the email
- 3. Choose "Offline activation"

4. From the "Generate License" window, download the RUS tool (Remote Update System)
