- Ability to configure a customized booting

[For more information, see release notes for Drive Eraser 6.2.0](#)

Bug fixes:

- Fixed an issue where ISO images uploaded to Configuration Tool are kept in temp-folder which eventually eats free disk space.
- Fixed an issue where incorrect product name was shown in Windows Services.
- Fixed an issue where older versions of Blancco 5 don't recognize the "CD ejection" setting.
- Fixed an issue where "Running_PID" file stops Configuration Tool from running.
- Fixed an issue where memory test is skipped while it is enabled on Configuration Tool.
- Fixed an issue with Hardware test settings layout is messed up.
- Fixed an issue which caused wrong product name to be shown in shell.
- Fixed an issue where disabling the hardware tests does not disable the memory test.
