

Blancco Management Portal Upgrade Wizard

Created	Updated	Affects version	Fix version
21 Mar 2023	05 Apr 2024	Management Portal Blancco Cloud	N/A

This page will guide you through the different steps included in the Blancco Management Portal Upgrade Wizard when upgrading from an existing Blancco Cloud environment to the new Blancco Management Portal.

If your company is entitled for the upgrade, users with "manager" role should have been notified through separate email communication and they should be able to access the wizard and start the upgrade process following the instructions provided in the email. If you are unsure whether you are entitled for the upgrade, contact your Blancco Sales Representative or [Blancco Technical Support](#).

What data is included as part of the upgrade?

Below table will provide you with a list of details included in the scope of the upgrade wizard and some key notes related to each item.

Category	Included as part of the Upgrade Wizard	Additional details
Groups/sub-groups	Yes, configurable by the user	During the wizard, you can select if you want to automatically migrate over existing groups.
Users	Yes, configurable by the user	During the wizard, you can select if you want to automatically migrate over existing users. NOTE! Depending on your current user hierarchy, some users may receive a higher level of access to the system and get visibility to all your Blancco reports when compared to before.
Predefined user roles	Yes	Predefined user roles are: Manager, Basic User, Auditor.
Custom user roles	No	Custom roles are not available in Management Portal. If a user with a custom role is migrated using the wizard the role will be automatically changed to "Basic User". Generally speaking this grants more permissions to the system.
Licenses	Yes	All licenses will be moved over to Management Portal as the final step of the Upgrade Wizard. NOTE! This will remove the licenses from the old system and after completing the step you will need to run your production against Management Portal!
EMS entitlement capability	Yes	Only included if feature is already enabled for your Blancco Cloud group.
Workflows	Yes	All available workflows are migrated over. NOTE! Default workflow information is lost during the transfer and default workflows will need to be manually re-selected after completing the wizard.
Reports	Yes, configurable by the user	Possibility to copy over no reports, last 6 months or last 12 months reports. If you require older reports to be migrated over they need to be transferred manually. See Transferring Reports from Blancco Cloud to Blancco Management Portal for more details.

Upgrade Wizard steps

After the upgrade process is started following the instructions provided in the separate email communication manager users will see an "Upgrade available" banner after logging in to the Blancco Cloud.

2. "Welcome to Bianco Management Portal (BMP) Upgrade Wizard" page will list the different steps you need to complete as part of the upgrade. In order to continue "I understand" checkbox needs to be selected.

Welcome to Bianco Management Portal (BMP) Upgrade Wizard

Bianco Management Portal upgrade is available for you. This new upgrade brings a host of new benefits: better enhanced security, performance, scalability, user experience and newer capabilities like sustainability dashboards, built on the latest AWS platform.

- 1 Bianco Management Portal account set up
- 2 User(s) created and workflow(s) sent
- 3 Log in to Bianco Management Portal
- 4 Configure ensure client settings
- 5 Transfer reports and licenses
- 6 Use Bianco Management Portal

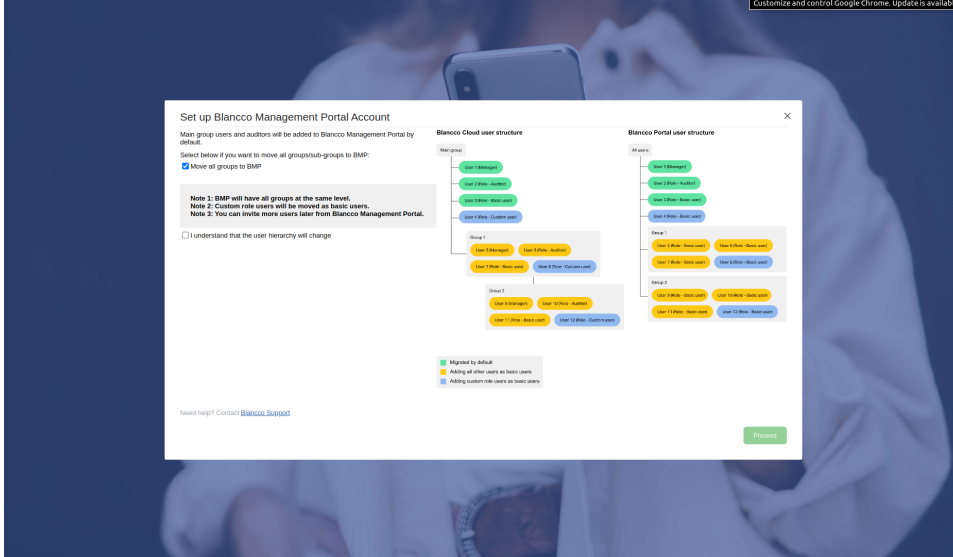

Note: This upgrade is irreversible, as your data, including licenses, will move to the upgraded portal. Bianco client product end-point settings will need to be reconfigured; it is advised that you proceed with the upgrade in non-production hours or with downtime in mind. Please follow below steps to proceed.

Do it later Start upgrade

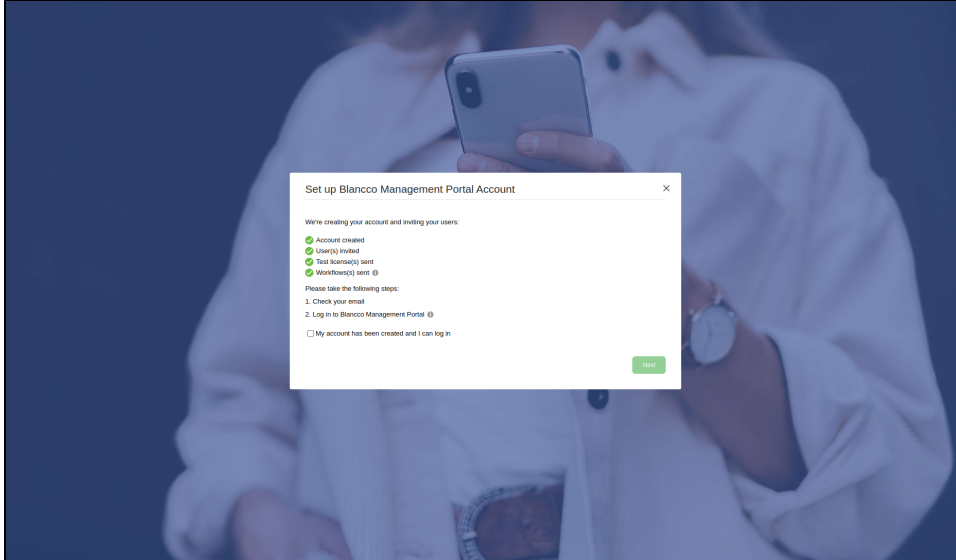

3. "Set up Blancco Management Portal Account". During this step you will define all groups including sub-groups moved to Blancco Management Portal. Select preferred option and check "I understand that the user hierarchy will change" to proceed.

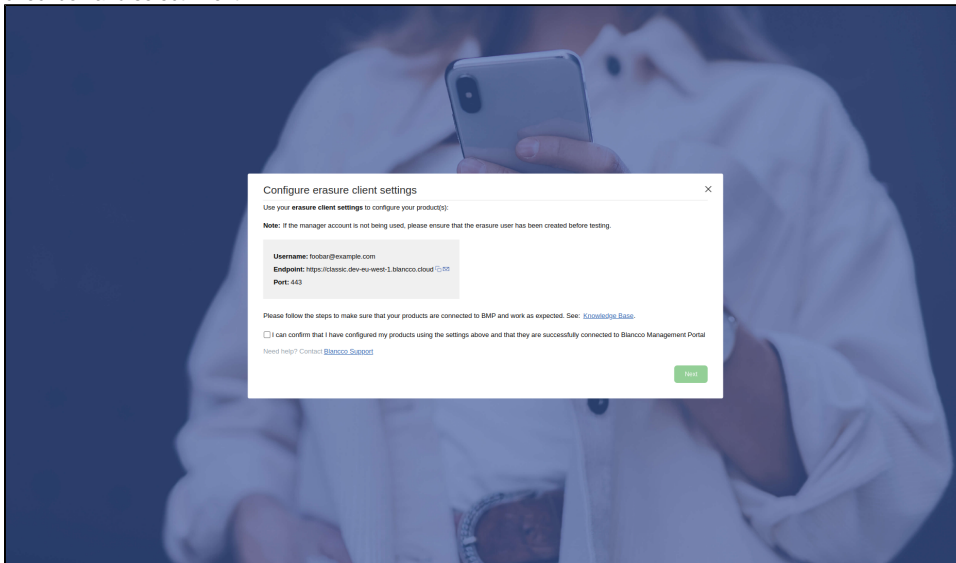

- a. By default all manager, basic user and auditor users from your main group will be included. These users are indicated by the green color in the example structure included in the page.
- b. Any user with manager, basic user or auditor role located in any sub-group will be included to sub-group users under the main group. These users are indicated by the yellow color in the example structure included in the page.
- c. Any user with a custom role will be included in addition to other users. These users are indicated by the blue color in the example structure included in the page.
4. An account will be created, defined users invited to the system and test licenses will be added to your new Management Portal account. Depending on the number of users this might take a few minutes.

5. After successfully creating the account and the users you are required to validate your newly created Management Portal account and login. In order to validate your account follow instructions on the separate email you receive directly from Management Portal. Once you have managed to complete the sign up and login to Management Portal select "My account has been created and I can log in" and then click "Next".

6. "Configure erasure client settings" page provides you with the new communication settings you will need to use in order to consume licenses /send reports to Management Portal. After you have tested the communication works with the updated settings check the "I can confirm..." checkbox and select "Next".

7. If you have been using Blancco Cloud API, review the updated Blancco Management Portal API endpoints and plan the required changes.
- Detailed API guide is available on Blancco Management Portal under the "Support" tab.
 - Additional Knowledge base content available in [Management Portal - API](#) page.

API endpoints in Management Portal are not backwards compatible!

In order to keep using the API, changes are required to meet the requirements for the new API endpoints!

8. "Transfer data" allows you to define the data copied over as part of the process, by default all licenses and workflows are included and user cannot edit these options. If you want copy over existing reports you can select either last 6/12 months worth of reports. If you need older reports to be available on the Management Portal, they need to be transferred over manually.

NOTE! API endpoints between Blancco Cloud and Management Portal are different and not backwards compatible!

If you are integrated with any Blancco Cloud API endpoint you will need to make sure any integration is updated to utilize Blancco Management Portal API endpoints when the "Transfer data" step is run!

After you confirm and click "Transfer data" your data will be copied over and your existing Blancco Cloud account will go into a read only mode and you cannot consume licenses from Blancco Cloud anymore.

Any further erasures will need to be carried out using Management Portal instead.

9. "Summary" page will appear once the data migration process is completed and you will be presented with the results of the data migration. If there are any issues or errors reported during this stage, please contact Blancco Technical Support for further assistance.
